

A SEA OF DISCOVERIES

AIR, LAND, WATER?

Our divers went to the Gaspé to take pictures of some specimens in their natural habitat. They need your help to find the animals, though. Look at the list of animals to be photographed, and read the clues carefully. Use a marker to colour in the animals to be photographed, on the illustration of the St. Lawrence Marine Ecosystem, and write their identification numbers next to them.

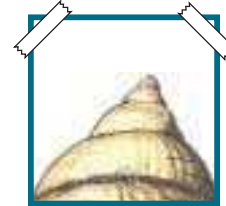

CLUES FOR FINDING THE ANIMALS TO BE PHOTOGRAPHED

1
American
lobster

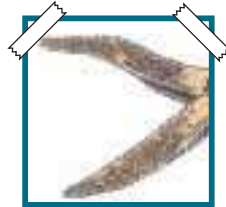

5
Black-legged
kittiwake

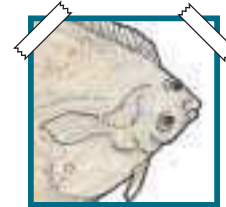

9
Waved
whelk

2
