

Mice and the Moon

Immersive film being shown at the Planétarium Rio Tinto Alcan

Audience: ages 3 to 6 Full dome experience Running time: 15 min 22 s

Who's taking a bite out of the Moon every night?

The secret is finally revealed at the Planétarium Rio Tinto Alcan with *Mice and the Moon!*

Created and produced in Minsk, Belarus, by dynamic young artists, pioneers in full-dome projection in their homeland, this animated film is a beautiful blend of fantasy and science. As two little mice look for answers, the film explains simply and clearly the secrets of the planets, and especially the Moon, which is different every night. This production won the award for **Best Full-dome Film for Children** at the Full-dome Festival held in Yaroslavl in 2017 and the **Annual Recommendation to Young Audience Award** at the 6th Beijing International Science & Technology Film Festival in 2018.
